

# SportEAR™

## Special Offer for NRA Camps and Clubs!

**SportEAR™**

**SportEAR PRO™**  
PROGRAMMABLE

**SportEAR DIGITAL™**  
DIGITAL VARIABLE FREQUENCY

Our most popular model with long distance sound amplification up to 36 dB and noise suppression of muzzle blasts louder than 95 dB. SportEAR features a soft shell that offers a comfortable, snug fit within the ear canal, delivering a Noise Reduction Rating (NRR) of up to 32 dB – more protection than any other device, *including bulky ear muffs!*

SportEAR's miniature size allows it to direct sound to the eardrum for more efficient sound quality and maintains the natural acoustics of the ear for maximum wind and background noise reduction (far better than behind-the-ear models).

### KEY FEATURES:

- Power – 36 dB
- Maximum Output – 110 dB
- Noise Reduction Rating (NRR) – 32 dB
- One-Size Fits All (CustomFit™ Technology)
- Micro ear canal unit
- Size: 1.06" high, .34" wide
- Weight: less than 1/4 ounce
- Operates on 10A, 1.4v Zincair battery (included)
- Large number volume control with integrated on-off switch
- Comes with carrying case
- No custom fitting required
- Seven colors to choose from

### SPECIAL NRA PRICE:

**\$399** (per pair)

Retail Cost: \$599 (per pair)

The QuestEssential SportEAR PRO is digitally enhanced. This allows the user to tune into specific frequencies in order to better hear their quarry, while still protecting their hearing from the damaging effects of muzzle blasts.

SportEAR PRO uses a proprietary technological circuit that allow users to fine tune the frequencies that might be missing from their range of hearing or to the precise frequencies of sound made by the game they are hunting. Users can customize the frequency response for high, medium, and low ranges. The one-size-fits-all SportEAR is created with a pliable outer shell that molds to comfortably fit most ear sizes.

### KEY FEATURES:

- Power – 36 dB
- Maximum Output – 110 dB
- Digitally Enhanced – tune into specific frequencies
- Noise Reduction Rating (NRR) – 32 dB
- One-Size Fits All (CustomFit™ Technology)
- Micro ear canal unit
- Size: 1.06" high, .34" wide
- Weight: less than 1/4 ounce
- Operates on 10A, 1.4v Zincair battery (included)
- Large number volume control with integrated on-off switch
- Comes with carrying case
- No custom fitting required
- Seven colors to choose from

### SPECIAL NRA PRICE:

**\$599** (per pair)

Retail Cost: \$798 (per pair)

Our best digital technology for the serious sportsman, SportEAR DIGITAL offers unbelievable CD quality sound! Because SportEAR DIGITAL processes the sound coming into the hearing instrument digitally, you can hear your game with outstanding clarity and virtually no distortion.

With SportEAR DIGITAL you get the most technologically advanced circuit available in sound amplification and hearing protection. The Digital Signal Processing (DSP) circuit has at least two channels to achieve optimal results. Each digital channel is controlled independently and handles a defined range of pitches – eliminating the need for external frequency adjustments.

### KEY FEATURES:

- 100% Digital, CD quality sound
- Power – 36 dB
- Maximum Output – 110 dB
- Noise Reduction Rating (NRR) – 32 dB
- One-Size Fits All (CustomFit™ Technology)
- Micro ear canal unit
- Size: 1.06" high, .34" wide
- Weight: less than 1/4 ounce
- Operates on 10A, 1.4v Zincair battery (included)
- Large number volume control with integrated on-off switch
- Comes with carrying case
- No custom fitting required
- Seven colors to choose from
